PROFESSIONAL SUMMARY

Computer Engineering graduate with a strong interest in Python development, web technologies, automation, and machine learning. Experienced in building responsive websites, Telegram bots, data automation tools, and predictive analytics projects.

Passionate about solving real-world problems through clean code, continuous learning, and modern software development practices.

TECHNICAL SKILLS

Programming Languages

- Python
- JavaScript
- HTML5
- SQL
- CSS3

Web Development

- Responsive Web Design
- REST APIs
- Front-End Development

- Basic Backend Development

Machine Learning & Data Analysis

- Machine Learning
- Data Preprocessing
- XGBoost
- LSTM
- Predictive Modeling

Tools & Technologies

- Git & GitHub
- Selenium
- BeautifulSoup
- Telegram Bot API
- VS Code

PROJECTS

Smart Traffic Prediction System

Developed a machine learning-based traffic prediction system using XGBoost and LSTM models. Performed data preprocessing, feature engineering, model training, and performance evaluation on real-world traffic datasets.

Telegram Project Finder Bot

Built a Telegram bot that automatically monitors freelance platforms, filters projects based on user-defined keywords, and sends instant notifications with project details.

Web Data Automation Suite

Created an automation toolkit using Python, Selenium, and BeautifulSoup for collecting, processing, and organizing data from multiple online sources with minimal human intervention.

Personal Portfolio Website

Designed and developed a fully responsive portfolio website showcasing projects, technical skills, and professional experience using modern web technologies.

PROFESSIONAL EXPERIENCE

Software Developer

Freelance Projects | 2023 – Present

Developing custom web applications, automation tools, and software solutions for personal and freelance projects using Python and modern web technologies.

Python Developer

Independent Projects | 2022 – Present

Building Telegram bots, web scraping tools, and automation systems to improve productivity and streamline repetitive processes.

Machine Learning Researcher

Research Projects | 2024 – Present

Working on machine learning applications for traffic prediction and intelligent transportation systems, focusing on model optimization and forecasting accuracy.

EDUCATION

Master of Science (M.Sc.) in Computer Engineering

Islamic Azad University | 2020 – 2024

Research focused on Machine Learning and Intelligent Transportation Systems.

Bachelor of Science (B.Sc.) in Computer Engineering

Shamsipour Technical and Vocational College, Tehran | 2015 – 2019

Focused on software engineering, databases, algorithms, and web technologies.

Associate Degree in Computer Engineering

Rasht Technical College | 2012 – 2014

Studied computer systems, programming fundamentals, and networking concepts.

LANGUAGES

- Persian — Native
- English — Upper-Intermediate
